Portfolio: https://vlad-dev.vercel.app/

EDUCATION

Southeastern Louisiana University, Hammond, LA | Bachelor of Science in *Information Technology, Graduated December 2025*
Relevant Courses: Software Engineering, Human-Computer Interaction, Information Systems

TECHNICAL SKILLS

Software Engineering: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Flutter (Dart)
Data & System Operations: Linux/Unix, LibreOffice (Calc/Writer), Excel, Git/GitHub, Database Management
AI & Workflow Automation: Claude Code, ChatGPT, Prompt Engineering, AI-Assisted Code Review
Process Automation Design & Multimedia: UI/UX Design, Figma, GIMP, Canva, Logo Design, Kdenlive, Video Editing

APPLIED PROJECT EXPERIENCE

Smart Advisor- Book & Movie Recommendations | Course: Human-Computer Interaction |August 2024– 2026 (Redesigned 2026)

• Engineered a comprehensive post-graduate frontend architecture overhaul, leveraging advanced AI-assisted pipelines (Claude Code) to refactor legacy components and scale application state management.
• Architected the complete end-to-end user experience (UX), mapping complex system workflows, algorithmic conditional routing, and core process logic for an interactive questionnaire data engine.
• Authored robust technical system requirements and schema specifications, verifying seamless backend data synchronization with multiple public REST APIs (TMDB, Open Library, & Deezer).
• Translated abstract multi-source data models into highly responsive, accessible web layouts compliant with modern web usability guidelines (WCAG/UI standards).
• Conducted rigorous software layout evaluations for operational efficiency, successfully presenting the finalized technical system architecture at the ULS Academic Summit.

Pao'er Ship- Raspberry Pi Battleship Game | Course: Computer Architecture | Jan 2025– May 2025

• Programmed a local player-vs-player gameplay system utilizing a micro-controller environment (Raspberry Pi), establishing state validation cycles to restrict cross-terminal visual rendering.
• Developed a dynamic object positioning and layout engine featuring manual rotation mechanics, index bounding checks, and automated validation algorithms.
• Designed an independent system clock utility utilizing visual interrupt cues and timing sequences to maintain optimal runtime operational flows.

Lion's Den Cinema- Cinema Application | Information Systems | Jan 2025– May 2025
• Designed user flows, wireframes, and high-fidelity prototypes in Figma for mobile and web platforms

• Engineered a responsive React/TypeScript frontend architecture, implementing custom dark mode state tracking and optimized components that cut layout rendering delays.
• Created reusable components including movie carousels, interactive seat maps, and QR code ticket generation.

ADDITIONAL EXPERIENCE

Personal Care Assistant– #1 in Home Care | June 2025– Present
• Providing day-to-day support with one's daily needs.
• Maintaining clear communication, professionalism, and trust in a high-responsibility role.
• Managed work responsibilities alongside full-time coursework while in school.
